

Pacific IngeniumSM Inc. Achieves Microsoft Certified Partner Status

Pacific Ingenium becomes a Microsoft Certified Partner in short time frame

MINNEAPOLIS – Sept. 24, 2010 – Pacific Ingenium, Inc., a unique service provider using Microsoft technology to build websites and robust backend systems, has become a Microsoft Certified Partner within a short time period. Pacific Ingenium is proud to have accomplished this achievement in such a short time frame when many companies take years to achieve this certification. Some companies never achieve this partnership level with Microsoft because of the requirement to maintain a number of certified professionals on staff.

Microsoft Certification is important because it recognizes companies that have professional software development talent and references from customers. It can be difficult to achieve because employees within the company must pass Microsoft certification exams to become a Microsoft Certified Professional. Pacific Ingenium was able to achieve this partner status so quickly by having professionals in China and US become certified. Our certified staff in China enables customers to increase their ROI when developing software.

About Pacific Ingenium, Inc.

Pacific Ingenium, Inc. helps customers increase their ROI on software products that they want to develop using Microsoft technologies like Silverlight, .Net, and SQL Server. They provide highly skilled certified professionals on site for analysis and design while sending the programming off shore. Development costs can be reduced by 50% with increased quality by staffing projects with Microsoft Certified Professionals in China. Pacific Ingenium has over 5 years of experience with offshore development. They have learned what causes projects to fail or succeed. With this experience, they created a unique process that will save companies money while delivering outstanding service and quality.

Pacific Ingenium is headquartered in Minneapolis and has an offshore campus in Nantong, P.R. China. For more details about Pacific Ingenium, call 612-293-9393 or visit their website at <http://www.pacificingenium.com>.
